## PROFESSIONAL SUMMARY

Frontend Engineer with 3+ years of experience building production-grade web and mobile applications using React.js, React Native, Next.js, and TypeScript. Proven ability to architect complex, data-driven interfaces, integrate real-time systems, and ship polished user experiences. Comfortable leading frontend decisions, building reusable component libraries, and collaborating closely with product and backend teams. BSc. Computer Science, University of Ghana.

## SKILLS

**Languages & Frameworks**: JavaScript, TypeScript, React.js, React Native, Next.js, HTML, CSS, TailwindCSS
**APIs & Real-Time:** REST APIs, GraphQL, WebSocket, Socket.io, Firebase, TanStack Query
**State & Performance**: React Context, TanStack Query, Code Splitting, Lazy Loading, Core Web Vitals
**Tools & Platforms**: Figma, Git, GitHub, Vercel, Firebase, Elasticsearch, Stripe, Paystack
**Soft Skills:** Cross-functional Collaboration, Product Thinking, Analytical Problem Solving, Team Leadership

## EXPERIENCE

### Frontend Engineer, Traaple
*Nov 2025 – Present*

*Hybrid · Accra, Ghana*

- Built complex, data-driven booking and checkout flows with cart hold timers, coupon handling, and multi-step payment integration via Stripe and Paystack — directly mirroring logistical workflow complexity.
- Developed experience discovery UI with Elasticsearch-backed filtering, real-time location search, and paginated results, handling high-density data environments.
- Architected global state across 8+ React Contexts and TanStack Query for server-side caching, synchronization, and efficient re-rendering at scale.
- Implemented real-time chat and notifications using Socket.io with typing indicators and conversation threading, demonstrating WebSocket and real-time systems experience.
- Built a multi-currency pricing system with automatic location-based detection and conversion across the entire UI.
- Contributed to vendor and creator dashboards including booking management, earnings views, and analytics — experience directly applicable to workforce and enterprise SaaS platforms.

### Co-founder & AI Software Engineer, EngineX
*July 2025 – Present*

*Accra, Ghana*

- Built and maintained responsive, mobile-first interfaces using Next.js and TypeScript, ensuring consistent cross-device experiences.
- Integrated RESTful APIs and third-party services, enabling seamless data flow between client and server.
- Optimized production systems through code splitting, lazy loading, and efficient rendering strategies, improving load times and Core Web Vitals.
- Developed reusable, scalable UI components and features aligned with product and design specifications.

### Co-founder & Frontend Developer, Ahoma
*Feb 2024 – Present*

*Accra, Ghana*

- Designed and developed a customer management web app for fashion designers using React.js and Firebase, enabling real-time data tracking and management.
- Led UI/UX research, built reusable components, and ensured full mobile responsiveness across the platform.

**System Administrator Intern, St. Luke Catholic Hospital** *Feb 2024 – May 2024*
*Apam, Ghana*

- Managed hospital IT infrastructure, troubleshooting system issues and implementing security measures to maintain operational integrity.
- Provided technical support, maintained systems, and configured new network devices to support reliable hospital operations.

**Frontend Engineer, Contract, Nestsoft** *July 2023 – March 2025*
*Remote · Accra, Ghana*

- Collaborated with backend developers and UI/UX designers to deliver polished, user-friendly products on schedule, demonstrating cross-functional communication skills.
- Developed and maintained scalable, production-ready React.js and Next.js applications, integrating REST APIs to enhance functionality and performance.
- Translated Figma designs into pixel-perfect, responsive interfaces, ensuring cross-browser compatibility and adherence to best coding practices.

**Frontend Developer, Mavritech** *Jan 2023 – Oct 2023*
*Accra, Ghana*

- Converted UI/UX designs into functional web applications and integrated backend APIs to fetch and display real-time data.
- Developed a Next.js faculty management platform for NAMSA to improve course content delivery and administrative workflows.

## LEADERSHIP

**Team Lead, Ahoma Software Team**
*Sep 2023 – Nov 2025*

- Managed team workflow, tracked deliverables, and ensured alignment between development and client expectations.

**Project Coordinator, Mavritech NAMSA Project**
*Jan 2023 – Oct 2023*

- Managed team workflow and deliverables, maintaining alignment between development and client expectations.

## EDUCATION

**BSc. Computer Science, University of Ghana** *Jan 2022 – Feb 2026*
**Relevant Coursework:** Web Design, Data Structures & Algorithms, Software Engineering, Mobile App Development, AI & Machine Learning, Databases, Computer Networks.
